Teaching the world to read...

Created by 2 award-winning teachers in California, Zoo-phonics® is a curriculum based whole-brain approach to language learning that has been used successfully in over 6,000 schools throughout the U.S.A.

The problem with the alphabet and learning how to read and spell is that it is too abstract. So, we made it concrete!

Zoo Toddlers (18 to 30 months)

Zoo Kids (3 years)

These theme based, multi-sensorial learning programmes aim to promote your child's speaking and listening skills through stories, rhymes, music and craft. Our cast of 26 animal characters will engage your child in phonics play.

Inny Inchworms (age 3 to 4)

This program helps develop phonemic awareness, an essential step in learning to read. As your little ones trek through the alphabet, they will learn the basic letter sounds and read simple word blends.

Young Joeys (age 4 to 5)

This program is designed to teach your child to read and spell. Our little readers will develop sound-blending skills, and progress to reading and writing simple text.

Wise Owls (age 5 to 6)

This program develops a foundation for more advanced reading and writing skills.

Creative Reading & Writing (age 5 to 8)

Speech Arts & Presentation (age 3 to 8)

This program aims to build children's confidence, enabling them to be eloquent speakers...
